

tf.test.TestCase

```
classDiagram
    class TestCase["tf.test.TestCase"]
    class MultiClassesTpFpTest["detection_utils.utils.per_image_evaluation_test.MultiClassesTpFpTest"]
    MultiClassesTpFpTest --|> TestCase
```

The diagram illustrates a class hierarchy. At the top is the 'tf.test.TestCase' class, represented by a white box with a black border, divided into three horizontal sections. The top section contains the class name. Below it are two empty sections. At the bottom is the 'detection_utils.utils.per_image_evaluation_test.MultiClassesTpFpTest' class, represented by a gray box with a black border, also divided into three horizontal sections. The top section contains the full class name. The middle section is empty. The bottom section contains a plus sign followed by the method name 'test_tp_fp()'. A blue arrow with an open triangular head points from the top of the gray box to the bottom of the white box, indicating that the gray class inherits from the white class.
