

tf.test.TestCase

```
classDiagram
    class TestCase["tf.test.TestCase"]
    class CorLocTest["detection_utils.utils.per_image_evaluation_test.CorLocTest"]
    CorLocTest --|> TestCase
```

The diagram illustrates a class hierarchy. At the top is a box representing the `tf.test.TestCase` class, divided into three horizontal sections. The top section contains the class name. Below it are two empty sections. At the bottom is a larger box representing the `detection_utils.utils.per_image_evaluation_test.CorLocTest` class, also divided into three horizontal sections. The top section contains the class name. The middle section is empty. The bottom section contains two method definitions, each preceded by a plus sign. A blue arrow points from the bottom of the `CorLocTest` box to the bottom of the `tf.test.TestCase` box, indicating inheritance.
