

detection_utils.core.preprocessor.random
_adjust_hue

```
graph LR; A[detection_utils.core.preprocessor.random_adjust_hue] --> B[detection_utils.core.preprocessor._augment_only_rgb_channels]; A --> C[detection_utils.core.preprocessor._get_or_create_preprocess_rand_vars];
```

The diagram illustrates a function call flow. A central box on the left, labeled 'detection_utils.core.preprocessor.random_adjust_hue', has two blue arrows pointing to two boxes on the right. The top box is labeled 'detection_utils.core.preprocessor._augment_only_rgb_channels' and the bottom box is labeled 'detection_utils.core.preprocessor._get_or_create_preprocess_rand_vars'.
