

detection\_utils.core.preprocessor.random  
\_rgb\_to\_gray

detection\_utils.core.preprocessor.rgb  
\_to\_gray

detection\_utils.core.preprocessor.  
\_rgb\_to\_grayscale

```
graph LR; A[detection_utils.core.preprocessor.random_rgb_to_gray] --> C[detection_utils.core.preprocessor._rgb_to_grayscale]; B[detection_utils.core.preprocessor.rgb_to_gray] --> C;
```

The diagram illustrates a mapping or inheritance relationship. On the left, there are two separate boxes. The top box contains the text 'detection\_utils.core.preprocessor.random\_rgb\_to\_gray'. The bottom box contains the text 'detection\_utils.core.preprocessor.rgb\_to\_gray'. On the right, there is a single, larger box with a gray background containing the text 'detection\_utils.core.preprocessor.\_rgb\_to\_grayscale'. Two blue arrows originate from the right side of the two boxes on the left and point towards the left side of the gray box on the right, indicating that both functions on the left are associated with or mapped to the function on the right.
