

tf.test.TestCase

```
classDiagram
    class TestCase["tf.test.TestCase"]
    class VRDDetectionEvaluationTest["detection_utils.utils.vrd_evaluation_test.VRDDetectionEvaluationTest"]
    TestCase <|-- VRDDetectionEvaluationTest
```

The diagram shows a class hierarchy. At the top is a box for 'tf.test.TestCase' with two empty slots below it. Below this is a larger box for 'detection_utils.utils.vrd_evaluation_test.VRDDetectionEvaluationTest' which contains two rows of attributes and methods. A blue arrow with an open triangle head points from the bottom of the lower box to the bottom of the upper box, indicating inheritance.

detection_utils.utils.vrd
_evaluation_test.VRDDetectionEvaluationTest

+ vrd_eval

+ setUp()
