

tf.test.TestCase

```
graph BT; A[detection_utils.core.losses_test.WeightedIOULocalizationLossTest] --> B[tf.test.TestCase];
```

The diagram illustrates an inheritance relationship. At the top is a box representing the `tf.test.TestCase` class, divided into three horizontal sections. The top section contains the text `tf.test.TestCase`, while the two sections below are empty. Below this box is a blue arrow pointing upwards. At the bottom is a larger box representing the `detection_utils.core.losses_test.WeightedIOULocalizationLossTest` class. This box is divided into three horizontal sections. The top section contains the text `detection_utils.core.losses_test.WeightedIOULocalizationLossTest`. The middle section is empty. The bottom section contains two lines of text, each preceded by a plus sign: `+ testReturnsCorrectLoss()` and `+ testReturnsCorrectLossWithNoLabels()`.

detection_utils.core.losses
_test.WeightedIOULocalizationLossTest

- + testReturnsCorrectLoss()
- + testReturnsCorrectLossWithNoLabels()
