

detection_utils.utils.test
_case.TestCase.execute

```
graph LR; A[detection_utils.utils.test_case.TestCase.execute] --> B[detection_utils.utils.test_case.TestCase.execute_cpu]; A --> C[detection_utils.utils.test_case.TestCase.execute_tpu];
```

The diagram illustrates a function call branching into two specific execution paths. A central box on the left, labeled 'detection_utils.utils.test_case.TestCase.execute', has two blue arrows pointing to two separate boxes on the right. The top box is labeled 'detection_utils.utils.test_case.TestCase.execute_cpu' and the bottom box is labeled 'detection_utils.utils.test_case.TestCase.execute_tpu'.
