

tf.test.TestCase

```
classDiagram
    class tf_test_TestCase["tf.test.TestCase"]
    class detection_utils_utils_test_case_TestCase["detection_utils.utils.test_case.TestCase"]
    detection_utils_utils_test_case_TestCase --|> tf_test_TestCase
```

The diagram illustrates a class hierarchy. At the top is the base class 'tf.test.TestCase', represented by a white box with a black border and two empty internal compartments. Below it is the subclass 'detection\_utils.utils.test\_case.TestCase', represented by a gray box with a black border and three internal compartments. A blue arrow with a hollow triangular head points from the subclass box up to the base class box, indicating inheritance.

detection\_utils.utils.test
