detection_utils.utils.np
_box_ops.iou

detection_utils.utils.np
_box_ops.intersection

```
graph LR; A[detection_utils.utils.np_box_ops.ioa] --> C[detection_utils.utils.np_box_ops.intersection]; B[detection_utils.utils.np_box_ops.iou] --> C;
```

The diagram illustrates a mapping or relationship between two source functions and a target function. On the left, there are two white rectangular boxes. The top box contains the text 'detection_utils.utils.np_box_ops.ioa' and the bottom box contains 'detection_utils.utils.np_box_ops.iou'. On the right, there is a single gray rectangular box containing the text 'detection_utils.utils.np_box_ops.intersection'. Two blue arrows originate from the right side of the two white boxes and point towards the left side of the gray box, indicating that both 'ioa' and 'iou' functions are mapped to or related to the 'intersection' function.
