_util._update_generic
```

```
graph LR; A[detection_utils.utils.config  
_util._update_generic] --> B[detection_utils.utils.config  
_util._validate_message_has_field]
```

A diagram showing a call from the function `_update_generic` to the function `_validate_message_has_field`. The first box, representing the caller, has a gray background. A blue arrow points from this box to a second box on the right, which represents the callee and has a white background. Both boxes have a thin black border and contain their respective function names in a monospaced font.
