

tf.test.TestCase

```
classDiagram
    class TestCase["tf.test.TestCase"]
    class GroundtruthFilterWithCrowdBoxesTest["detection_utils.utils.ops_test.GroundtruthFilterWithCrowdBoxesTest"]
    GroundtruthFilterWithCrowdBoxesTest --|> TestCase
```

The diagram illustrates a class inheritance relationship. At the top is the superclass 'tf.test.TestCase', represented by a rectangle divided into three horizontal sections. The bottom section is empty. Below it is the subclass 'detection\_utils.utils.ops\_test.GroundtruthFilterWithCrowdBoxesTest', represented by a shaded rectangle divided into three horizontal sections. The top section contains the class name. The middle section is empty. The bottom section contains a public method 'test\_filter\_groundtruth\_with\_crowd\_boxes()' preceded by a '+' sign. A blue arrow points from the subclass to the superclass, indicating inheritance.

detection\_utils.utils.ops  
\_test.GroundtruthFilterWithCrowd  
BoxesTest

+ test\_filter\_groundtruth  
\_with\_crowd\_boxes()
